Real-time analytics

Gain visibility into key network operations metrics with Mist AI
Reduce TCO and OpEx of managing networking infrastructure with Mist AI so you can focus on innovating and providing exceptional client experiences.

AI Ops that IT teams love

Juniper's AI-Native Networking Platform automates deployment and management to reduce TCO and OpEx across your operations.

Protection for client transaction data

Built on Zero Trust architecture
Ensure financial transactions are securely processed on reliable, stable networks
Secure edge for consistent user, device, and application security policies

**AI-Native
Networking in action**

Zero Trust
framework

“Juniper’s connected security approach helps us implement a Zero Trust framework from a network perspective. With different industry- and state-level security regulations, including New York and California, we want to make sure we do everything we can to protect our customers and data.”

Keeping the focus
on innovation

“Our network-related helpdesk requests have dropped tremendously since deploying Juniper. With the insights that Mist AI brings, the IT team can easily identify the root cause of a user’s problem, whether it’s the network itself or an issue with authentication, DNS, or something else, without leaving our desks.”

Simplified network
automation

“With a High-IQ Network from Juniper, 7ticks can scale to meet the massive explosion of data and accelerate the deployment and delivery of critical applications. Having a simple, open, and smart data center infrastructure allows 7ticks to forge ahead with network automation and orchestration tools, delivering greater operational efficiencies and reducing errors.”

Providing exceptional
customer experiences
and achieving
compliance

“Protecting our business and reputation means we need to continually enhance security with the most effective cybersecurity technology as an added value for our customers and to future-proof our operations. The Juniper solution allows us to maintain the maximum level of confidence for our clients and support us for our GDPR journey.”

Why Juniper

The NOW Way to Network

Juniper Networks believes that connectivity is not the same as experiencing a great connection. Juniper's AI-Native Networking Platform is built from the ground up to leverage AI to deliver exceptional, highly secure, and sustainable user experiences from the edge to the data center and cloud. Additional information can be found at Juniper Networks (www.juniper.net) or connect with Juniper on [X](#) (Twitter), [LinkedIn](#), and [Facebook](#).
